PERSONAL PROJECTS

Mini-MicroBlog Website (03/2023 - 03/2023)
- A Website where we could list article,where we could delete articles.We can also add listing of new articles.It is a simple project the covers the react basic and fundamentals from using state to react router,how and where to fetch data,how to use react hooks use state and use effect,as well as creating custom hook as well.

MOVIE BOOKING SYSTEM (11/2021 - 12/2021)
- A system that helps the user to book his or her tickets from home. A system well built for users who do not want to leave their cushions and do not want to wait in long lines . A system with different movies running in different cinemas at the same time with user friendly Environment with perfect login and signup page.

Real-Estate Website (04/2023 - 04/2023)
- A Website providing a beautiful UI ,where we can find any property depending on whether if its a house or an apartment which varies according to its price, this projects cover the fundamentals where I have used functional components, hooks such as use state,use effect and use context more over use of react icons routers and utilization of large data
