

Hassam Arshad

| Technical Consultant -- Banking & Trade Finance Systems | hassamarshad021@gmail.com |
| 03342702174 | Karachi, Pakistan |

EDUCATION

UNIVERSITY OF KARACHI (UBIT)

BACHELORS IN COMPUTER SCIENCE
2021 | 2024

APTECH

DIPLOMA IN IT
2022

NCR-CET COLLEGE

INTERMEDIATE (PRE-ENGINEERING)
2018 | 2020

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

Java, JavaScript, TypeScript, Dart, Python

FRAMEWORKS LIBRARIES

Spring Boot, Angular, Flutter

BANKING PLATFORMS

Oracle FCC, Fusion Trade Innovation (FTI), Misys/Finastra T1 Plus 2, IBM WebSphere

TOOLS DATABASES

Oracle DB, PostgreSQL, MySQL, MongoDB, Eureka, Git, Postman

DEVELOPMENT AREAS

Trade Finance (Import LC, Treasury, Charges),
Event-Sourcing & Microservices,
Core Banking Connectivity, RESTful APIs
Cross-Platform Apps, UI/UX, Firebase
Integration

LINKS

Linked in | GitHub | Portfolio |

HIGHLIGHTS

- Hands-on FCC/FTI implementation across bank branches.
- Trained in FCC setup, installation, and Oracle DB administration.
- Built an event-sourced Trade backend in Spring Boot and Angular.
- Proficient in Git, GitHub Actions, and collaborative Agile environments.

PROFESSIONAL EXPERIENCE

INFOTECH PVT LTD | TECHNICAL CONSULTANT -- BANKING SOLUTIONS (FCC, FTI)

2025 -- Present | Karachi

- Implement, integrate, migrate, and customize Oracle FCC and FTI across different banks.
- Trained in FCC and FTI setup, installation, customization, and Oracle database administration; IBM MQ; document customization requirements for FCC 6.2.4.2 and FTI 2.10.5.0.
- Install and customize FCC 6.2.4.2, including Angular branding, localization, interfaces, and portlets, with core banking application connectivity.
- Contribute to an in-house core banking product built with Java, Spring Boot, and Angular, structured as microservices with a Eureka discovery server.
- Design and maintain an event-sourced Import LC backend, including the full amendment lifecycle (draft/submit/approve/reject) and field-level LC diffing.

THE DISRUPT LABS | SOFTWARE ENGINEER

November 2023 -- December 2024 | Dubai

- Developed and maintained modular Flutter codebases for scalable cross-platform mobile applications.
- Integrated RESTful APIs, Firebase Authentication, and real-time database features.
- Applied secure coding practices and implemented offline-first architecture.

THE INNOVATIVE SOLUTIONS | SOFTWARE DEVELOPEMENT EXPERIENCE

May 2023 -- November 2023 | USA

- Designed pixel-perfect UI/UX in Flutter based on Figma wireframes and Material Design guidelines.
- Integrated REST APIs and managed asynchronous data flows with Streams/Futures.

KEY PROJECTS

TRADE FINANCE SETTLEMENT SYSTEM | JAVA | SPRING BOOT | ANGULAR

- Built a trade finance backend with an event-sourced Import LC module, handling the full amendment lifecycle and field-level diffing between LC versions, as part of a Spring Boot microservices architecture with a Eureka discovery server.

INSPECTION SYSTEM | MOBILE | WEB

- Leveraged Flutter's async capabilities for background syncing and storage.
- Developed an offline-first system with Flutter using PDF parsing and data visualization tools.

SHAN FOOD APPLICATION | MOBILE | DESKTOP | WEB

- Implemented AI-based object detection in Flutter with efficient state management using GetX.
- Ensured smooth cross-platform performance and optimized UX responsiveness.
